## End-of-roll/leftover fabric

Do you want to improve your material sourcing to be more sustainable? However, you cannot afford sustainably produced materials, especially locally?

Well, sustainable material sourcing is not just about sourcing materials made from natural fabrics. It also includes reimagining the life of old textiles too, such as end of roll fabric / fabric leftover after production fabric.

*What we have on offer:*

- 100% polyester (woven) in beige, white, blue, navy
- 2-ply PVC coated stretch fabric in light beige

Price: R 50 / meter

# SAMPLES, ORDERING & PAYMENT

[www.rewoven.africa](http://www.rewoven.africa)

## Samples

Please note that our samples are 1 meter in length. We do not make samples less than 1 meter. Therefore, to order a sample, you should place a minimum order of 1 meter.

If you are based in Cape Town, you are most welcome to visit our warehouse to have a look at what we have in stock. Please let us know if you are interested and we can arrange a time for you to come in.

## Fabric purchase

If you like the samples and would like to purchase the fabric, you can proceed to make an EFT payment and then send us a proof of payment.

Please note that if you are not based in Cape Town, your fabric purchase price will be inclusive of the delivery fee.
